OBJECTIVE

Practice full-scope, primary care and medical optometry.

My previous experience in medical management of eye conditions includes:

BDR, CSME, PDR, VKH, ALL, K and conj. FB, keratoconus, iritis (gran. and non-gran.), episcleritis, glaucomas, cataracts, AMD, high RE, anisometropia, amblyopia, GPC, conjunctivitis, DES, MGD, hordeolum, phlyctenulosis, marginal K infiltrates, central keratitis, RCE, K abrasion, pingueculitis, inflamed pterygium, Dellen, macular hole, RD, retina holes, adeno-keratitis, pituitary adenoma, hyphema, orbital/preseptal cellulitis, III/IV/VI nerve palsies, papilledema, CRVO, BRVO, CME, phthiriasis, & more.

I am an expert refractionist and routinely diagnose: astigmatism, myopia, hyperopia, anisometropia, amblyopia (strabismic and refractive). I routinely and reliably use my retinoscope with the phoropter and skiascopy lens bars. I detect CE, CI, DE, DI, eso, exo, accommodative paresis, and I treat these with glasses and/or easy home VT assignments.

I am competent with PIM/EHR software and computer networks and have experience with IHS's RPMS-EHR. Also I am a certified VistA imager. I know how to accurately code my exam encounters with appropriate CPT procedure codes and ICD-10 diagnosis codes.
